See the applicable law in your Country for traditional
mesotherapy treatments.

DESCRIPTION

Dehydration and loss of firmness are signs of skin aging that lead to wrinkle formation and sagging of some face areas.

3.5% hy-ac U-low density solution^{/19} is a non cross linked hyaluronic acid of low molecular weight that acts as anti-aging treatment improving the texture of the skin, the fine wrinkles and scars in the face and neck area when is distributed into the mesoderma. It's very low viscosity allows a better distribution through the dermal layer improving the texture and hydration of the skin avoiding water loss as well as facilitating the delivery of other substances to the skin. At the same time stimulates collagen I synthesis.

ACTIVE INGREDIENTS

Hyaluronic acid (combination of HA of high and low molecular weights).

BENEFITS

Reduces wrinkles and fine lines
Stimulates collagen synthesis
Firms the skin
Moisturizes
Improves skin softness
Reduces redness

POSSIBLE MIXTURES

vit-F10 cocktail^{/18}
vitamin C^{/32}
detox solution^{/07}
anti-OX solution^{/08}
anti-ROS solution^{/09}

MESO PROTOCOL

Recommended time between sessions

Using meso-pen or derma-roller 7-10 days interval
Traditional 7-10 days interval

Number of sessions

Starting treatment 4-6
Maintenance every 3-4 months

PERESNTATION & REFERENCE

Vial.....5 mL (0.176 fl. oz)
Box.....10 x 5 mL vials
Reference.....102070

Biological product sterilized by filtration
No paraben, alcohol, ingredients of animals origin or colouring.
Microbiologically tested.
