mesotherapy treatments.

DESCRIPTION

Hair loss can be caused by many factors, both in men and women, regardless of age. Alopecia is divided into non-scarring (the hair follicle is not destroyed, only its functionality is changed) and scarring (the hair follicle can be destroyed, causing its decline and weak presence). Finally most forms of hair loss are caused by hormone imbalance in and around the hair follicle, lack of right nutrients and reduced blood circulation. hair solution⁰⁴ is a solution designed to reinforce hair bulbs and stimulate hair growth to prevent hair loss. It has a mixture of potent anti-oxidants that optimizes metabolic performance of the catabolic and anabolic pathways and protein synthesis. It seeks a longer duration of anagen phase (growth). The caviar extract provides active amino acids in free form or as essential peptides basic in cell activation and stimulation processes, having at the end stimulation of blood circulation and as result the hair follicle can grow and survive.

ACTIVE INGREDIENTS

Piscum ovum extract, Cysteine, Iron, Thiamine

BENEFITS

Stimulates cell metabolism
Longer duration of anagen phase
Slows follicle aging process
Prevents hair loss
Improves microcirculation of scalp
Helps accelerate hair growth

POSSIBLE MIXTURES

vit-F10 cocktail¹⁸

MESO PROTOCOL

Recommended depth per area

Scalp0.7-2.0 mm

Recommended time between sessions

Using meso-pen or derma-roller 6-7 days interval
Traditional 6-7 days interval

Number of sessions

Starting treatment 6-8
Maintenance every 2-3 months

PERESENTATION & REFERENCE

Vial.....5 mL (0.176 fl. oz)
Box.....10 x 5 mL vials
Reference.....102810

Biological product sterilized by filtration
No paraben, alcohol, ingredients of animals origin or colouring.
Microbiologically tested.
